

**Product Name :**  
Automatic Shampoo Filling Machine

**Product Code :**  
FOOD-COS005

### Description :

Automatic Shampoo Filling Machine Line

### Technical Specification :

This bottle filling machine line is suitable for high viscosity materials filling capping and labeling. We can equip the whole line from bottle feeder to bottle collector with the complete production line.

This machine integrates automatic bottle feeding, filling, capping machine labeling and ink jet printer etc. It depends on how many machines client want to order and what capacity client need.

English man-machine interface operation, convenient and easy to understand

Linear design makes it easy to connect with other machines.

All parts in contact with materials are made of high-quality stainless steel materials. Contact with material uses SUS 316L Servo filling.

Imported programmable controller + imported touch screen control, stable performance and high reliability.

Waterproof design of the countertop, easy to clean with water.

Quick disassembly design, easy to disassemble the peristaltic pump pipeline

The frequency converter adjusts the speed to meet the filling requirements of different products.

No bottle no filling function, automatic output counting function

Automatic detection of in and out bottle photoelectric sensor, automatic matching of machine action.
