

Product Name :
Full Automatic Blow Molding Machine

Product Code :
FOOD-AUT0002

Description :

Full Automatic Blow Molding Machine

Technical Specification :

Advanced PLC control system, stable performance, automatic feeding of bottle embryo.

By rotating the bottle itself and rotating in the infrared preheater at the same time in the track, the bottle has strong permeability and good and fast heat distribution

Height adjustability: the length of the lamp tube and reflector in the preheating area and the permanent temperature in the preheater are adjusted by using an automatic thermostatic device, so that the preheater can preform preforms in shape.

Each mechanical action is equipped with safety automatic locking device, so it has high safety. Once some program fails, the program will become safe.
